

## WHEN YOU AREN'T READY TO SAY I LOVE YOU

There are a dozen nameless countries inside you,  
whole moons you have not experienced yet.  
The world is big, but within you  
there is an even bigger universe,  
and, no, there is nothing wrong with you  
if you haven't yet begun to feel every single emotion  
that makes up that big word that is love,  
because here is the secret:  
you can still care for someone without saying those words.  
You just need to remind yourself  
that it will take you time to get there,  
the same way it takes years  
for nature to build a river  
that finally reaches the sea,  
but when it is built  
no one can stop it from loving the sea  
for all it is worth.
